CARROLL, CATHERINE. Influences of dietary carbohydrate-fat combinations on various functions associated with glycolysis and lipogenesis in rats. II. Glucose vs. sucrose with corn oil and two hydrogenated oils, 163.
Cat(s), pantothenic acid deficiency in, 135.
CEDERQUIST, DENA C. See Arata, Dorothy, 150.
CEDERQUIST, DENA C. See Rikans, Lora Long, 83.
CHANG, YET-OY AND D. M. HEGSTED. Lactose and calcium transport in gut sacs, 297.
Chelates, various, effect on growth-promoting activity in turkey poults fed zinc-deficient diet, 249.
Chicken(s), absorption of preformed vitamin A from ligatured intestinal sections of, 99.
—, adaptation to dietary energy source, 115.
—, effect of stress from high protein diets on vitamin A metabolism in, 188.
—, effect of zinc nutrition on uptake and retention of Zn^{65}, 489.
—, growing, influence of protein and energy on growth and protein utilization in, 463.
—, importance of dietary copper in formation of aortic elastin, 318.
—, influence of high protein diets on vitamin A metabolism and adrenal hypertrophy in, 139.
—, male, energy intake and fertility of, 183.
—, nonspecific role of arginine in promotion of muscular dystrophy in, 415.
—, proportions of essential amino acids for rapid growth, 67.
—, vanadium toxicity and distribution in, 106.
Chlortetracycline, effect on growth and gastrointestinal urease activity in chicks, 93.
Cholesterol, dietary, effect on plasma and liver lipids in rats, 311.
— levels in men and kind of dietary carbohydrate, 338.
— metabolism in rat, influence of nicotinic, picolinic and pyridine-3-sulfonic acids on, 157.
— -fed guinea pigs and rats, adrenal lipids of, 443.
Cholic acid, effect on plasma and liver lipids in rat, 311.
Choline, effect on plasma and liver lipids in rat, 311.
CHOW, BACON F., AND CHI-JEN LEE. Effect of dietary restriction of pregnant rats on body weight gain of the offspring, 10.
Coccidiosis and dietary protein levels, mechanism of interaction between, in chicks, 301.
Cold exposure and amino acid imbalance in rats, 333.
COOK, C. R. See Lyman, R. L., 432.
Copper, dietary, importance in formation of aortic elastin, in chicks, 318.
COPPING, ALICE M. Sir Jack Cecil Drummond, F.R.S. — a biographical sketch, 1.
CRAMPTON, E. W. Nutrient-to-calorie ratios in applied nutrition, 353.
Creatine, dietary, and related compounds, effects on tissue glycogen deposition in rats, 301.
Creatinuria, tocopherol deficiency-induced, effect of degree of fatty acid unsaturation in, 19.

D

D-Histidine, promotion of growth by, antagonism of D-forms of essential amino acids toward, 243.
DEHORITY, B. A. See Nelson, E. C., 263.
DE MUELENAERE, H. J. H. Studies on the digestion of soybeans, 197.
Diet(s) containing amino acids and proteins, relative potency for promoting growth of rats, 76.
—, fermented soybean, effect on utilization by weanling rats, 452.
—, high fat, and niacin, and alterations in enzyme and coenzyme systems, in rats, 83.
—, high protein, effect on vitamin A metabolism and adrenal hypertrophy in chick, 139.
— restriction of pregnant rats, effect on offspring, 10.
Digestion of soybeans, studies on, in rats, 197.
DOBSON, D. C., J. O. ANDERSON AND R. E. WARNICK. A determination of the essential amino acid proportions needed to allow rapid growth in chicks, 67.
DODDS, MARY L. Protein and lysine as factors in the cariogenicity of a cereal diet, 217.
Dogs, effect of water intake on nitrogen metabolism in, 469.
DONALDSON, W. E. Adaptation of the chick to dietary energy source, 115.
DRUMMOND, SIR JACK CECIL, F.R.S. — a biographical sketch, 1.

E

EATON, H. D., W. B. BOUCHER AND P. C. SHAH. Vitamin A in serum and liver of weanling pigs fed a protein-deficient diet and fixed intakes per unit of live weight of carotene in oil, 343.
EDTA and prevention of vanadium toxicity, 106.
Egg oil, effects on plasma and liver lipids, in rats, 311.
Elastin, aortic, and dietary copper, in chicks, 318.
EMERSON, GLADYS A. See Walker, Jane B., 311.
Energy and protein, influence on growth and protein utilization in growing chicken, 463.
—, dietary, source, adaptation of chick to, 115.
— intake and fertility of male chickens, 183.
— -protein relationship in adult rats. I. Effects of varying amounts of protein and food energy on nitrogen utilization, 224.
Enzyme systems, alterations induced by supplementing fat diets with niacin, 83.
Enzymes, digestive, response to dietary protein, in rats, 409.
ERICSON, L.-E. See Kihlberg, R., 385.
Erythrocyte fatty acids, response to various dietary fats, in rat, 329.
—, rat, effect of dietary fat on stability of, 323.

F

Fat(s) and protein, heat of combustion values in body and wool of sheep, 145.

— and protein, reproductive performance of rats fed various levels of, 257.
— -carbohydrate combinations, influences on various functions associated with glycolysis and lipogenesis in rats. II. Glucose vs. sucrose with corn oil and two hydrogenated oils, 163.
—, dietary, and structure and properties of rat erythrocytes. II. Effect of dietary fat on stability of erythrocyte, 323.
—, dietary, and structure and properties of rat erythrocytes. III. Response of erythrocyte fatty acids to various dietary fats, 329.
—, hepatic, effect of variations in dietary nitrogen on, in rats, 231.
— intake, influence on morphologic and biochemical changes in young rats force-fed a threonine-devoid diet, 269.
—, liver, accumulation in threonine-deficient rats, biochemical lesions associated with, 150.
—, liver, in rat, effect of amino acid supplementation of rye flour on, 385.
— metabolism, and kind of dietary carbohydrate, in men, 338.
— metabolism, effect of insulin in vitamin B_6-deficient rats, 371.
Fatty acid(s), erythrocyte, response to various dietary fats, in rat, 329.
— — oxidation and adaptation of chick to dietary energy source, 115.
— — synthesis in isoleucine-deficient rats, 432.
— — unsaturation in tocopherol deficiency-induced creatinuria, effect of degree of, 19.
Feeley, Ruth M. See Irwin, M. Isabel, 338.
Fermentation of soybeans, and acceptance of diet by weanling rats, 452.
Fertility and energy intake of male chickens, 183.
Friedrich, Barbara. See Swendseid, Marian E., 206.
